

Safely heat process solvents and acids indirectly

SHB/SHC DATA SHEET

250 watts to 2000 watts (varies per

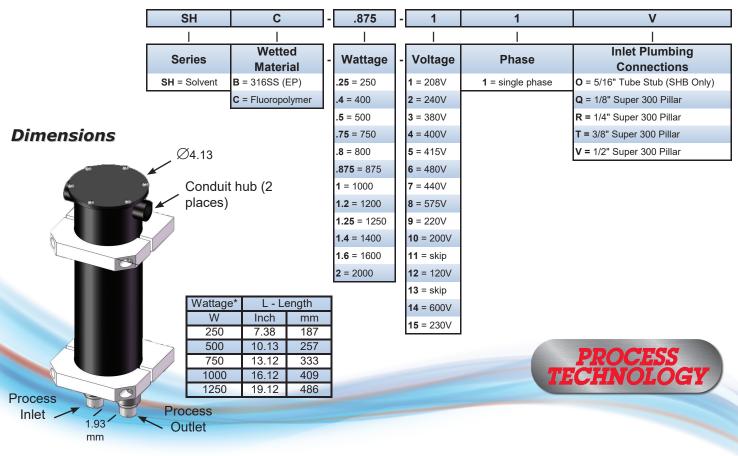

Features & Values

- The SHB and SHC Series electric inline heaters are optimized to safely heat process chemistries through indirect contact instead of direct immersion and deliver superior temperature stability with changes in flow.
- Low-flow inline chemical and solvent heater for a variety of applications and industries including solvent heating, wafer cleaning, etching, stripping and IPA heating.
- > Alternative to smaller cast aluminum inline heaters.
- Enhanced service life: Durable, heavy wall PTFE construction lasts substantially longer than comparable thin wall PFA housings.
- SHB series electropolished 316 stainless steel wetted surfaces suitable for heating solvents and alkaline chemicals.
- SHC series heater PFA wetted surfaces suitable for heating solvents, acidic chemicals, and IPA.
- Resistance heat or PTC (self-limiting) chips as a heat source offered.
- Flexible mounting can be installed horizontally or vertically.

	product line.
Voltages	120 volts to 480 volts, single phase
Temperature Range	Up to 180° C.
Pressure Range	Up to 1379 kPa.
Fluid Connections	3mm, 6mm, 9mm or 12mm. Custom connections available.
Safety Features	 Grounded metal construction Multiple element thermocouples or RTDs. Insulated housing Hermetically sealed high limit thermal cutoff device (TCO). Dual containment plumbing available as an option
Certifications	CE, ETL (tested to UL 823, UL499 and CSA C22.2)
